GHAVAM CONCRETE ADHESIVE

GHAVAM Concrete Adhesive is made on the basis of emulsion and synthetic resins and lubricant materials. This product makes the installation of tiles easy and there is no need to remove or demolish the former groundwork. Applicable on plaster, stone, mosaic, cement and tile.

Technical Data:

Base:	Emulsion Resin
Appearance:	Milky-white, transparent after drying
Solid Content:	39 %, minimum
Viscosity:	50 to 200 Poise (measured by Brookfield RV at 25 °C)
pH Value:	5 - 7
Density:	1.09 gr/cm ³

Packing: (Gross weight): Quart (760 gr), buckets (3Kg, 8Kg & 20 Kg)

Instructions for Use:

- 1-It is recommended to use in over +7 °C
- 2-Mix proportion of 2 to 3msr, water with 1msr, concrete adhesive and use it as liquid content of mortar.
- 3-Mix proportion of 1msr GHAVAM Concrete Adhesive, 1msr water, 2msr cement and use it as primer on repairing surfaces.

Shelf Life:

Approx .12 months when stored properly above 0 °C .

Advantages of Concrete Adhesive:

- Higher adhesion of mortar.
- No sag
- Suitable for under coating concrete cosmetic, repairing concrete cracks, cavities and art affairs.
